

COUNTY OF SANTA CLARA

**Behavioral Health Services**

Supporting Wellness and Recovery

DATE: May 11, 2026

TO: Honorable Board of Supervisors  
James R. Williams, County Executive

FROM: Sherri Terao, Director of Behavioral Health Services

RE: County Clinic Consolidation

The Behavioral Health Services Department (BHSD) is submitting this memorandum to provide a clear and comprehensive explanation of the analytic process that informed the outpatient clinic consolidation decisions included in the Fiscal Year (FY) 2026-2027 Recommended Budget. These decisions were made in the context of a structural deficit of approximately \$100 million in BHSD's budget, driven by long-term expenditure growth, depletion of fund balances, Medi-Cal revenue disruptions, and the transition from the Mental Health Services Act (MHSA) to the Behavioral Health Services Act (BHSA). BHSD's objective throughout the budget proposal development process has been to propose actions that will stabilize the system, preserve core services, center equity and client service needs, and maintain compliance with State-mandated network-adequacy requirements, while ensuring long-term sustainability of the Department and its programs.

### ***Analysis of Access, Quality, Performance, and Equity***

To determine whether County-operated clinics could be consolidated without compromising access or quality, BHSD conducted a multi-step analysis of its Adult and Older Adult (AOA) and Children, Youth, and Families (CYF) outpatient networks using data from BHSD's electronic health record system (myAvatar) and claims data therein. The first step in this analysis was an absorbability assessment, which examined whether clients served at each clinic could be absorbed by nearby providers within the State's time-and-distance standards designed to ensure clients can be served within 30 minutes or 15 miles of their residence. The analysis demonstrated that there is sufficient capacity available at other clinics in the areas surrounding all of BHSD's centrally located clinics (refer to **Attachment A** and **Attachment B**). Only two clinics were identified as clinics for which closure would lead to insufficient nearby capacity: 1) South County Narcotic Treatment Program and 2) South County Behavioral Health in Gilroy. All other County-operated adult outpatient clinics had sufficient nearby capacity to absorb clients.

The second step of the analysis focused on clinic performance and other operational indicators, including client engagement, productivity (the percentage of clinician's time that is spent providing direct, billable services), conversion rates (percentages of referrals that result in clients actually being seen at the clinic), and timeliness data (days from referral to first offered appointment).

County-operated clinics, such as Central Wellness and Benefits Center (CWBC), Josefa Chaboya de Narvaez Behavioral Health (Narvaez), and Downtown Behavioral Health Clinic (Downtown), consistently ranked in the lowest performance tier—particularly in terms of productivity, successful discharges, and client engagement. These findings likewise reinforced the fact that ensuring sustainable, effective client service will require the Department to consolidate County clinics into fewer, higher-performing, better-resourced sites to improve operational performance and client outcomes.

The third step incorporated contextual and equity considerations, including client demographics, language needs, race and ethnicity, geographic distribution, and historical utilization patterns. This review confirmed that consolidating services currently provided at CWBC and Narvaez into the Downtown Clinic would not diminish access for Spanish- or Vietnamese-speaking clients, as the Downtown Clinic and other nearby clinics operated by County Contracted Providers (CCPs) serve similar populations and are well-equipped to meet these clients' needs. In addition to these assessments, BHSD conducted capacity modeling and stress testing to evaluate whether remaining clinics could absorb redistributed caseloads while maintaining access and timeliness of service. The absorbability model examined current clients, future referrals, expected discharges, temporary closure patterns, and growth trends. The analysis found that CWBC and Narvaez all had nearby clinics with adequate capacity to absorb their current and anticipated future clients, particularly with modest increases in provider capacity of up to 15 percent. Temporary clinic closures (where a clinic closes to new referrals for a limited time) were also evaluated. Although the entire network (both CCP and County-operated) has experienced 71 temporary closures across 15 clinics over two years, the system continued to admit above-average numbers of clients even during closure spikes, demonstrating resilience and the ability to absorb additional demand with appropriate transition planning.

### ***Budget and Cost Considerations***

Budget and cost considerations were a necessary part of the decision-making process. Analysis of contracted program vs. County program costs revealed that County clinics have significantly higher costs per hour of client service than CCPs. Average cost per hour of service for CCPs is well below the cost per hour of service to deliver the same service in a County-operated clinic. **Tables 1** and **2** below reflect the comparison.

**Table 1: Average Cost per Hour for CCPs**

Program Type	Average Cost Per Hour CCP*
• AOA Outpatient	\$117
• CYF Outpatient	\$145
• AOA Substance Use Treatment Services (SUTS)	\$115
• Youth SUTS	\$269

\*CCP cost per hour of service is determined by the total payments to CCPs under the contract minus the total revenue generated by Medi-Cal billing over all hours of service.

**Table 2: County Clinic Cost Per Hour of Service**

Clinic	Cost Per Hour of Service**
• Narvaez	\$684
• CWBC	\$605
• Alexian Children, Family & Community Services (CFCS)	\$372
• Alexian Health Clinic	\$1,187
• Central Treatment and Recovery	\$428

\*\* The County cost per hour of service is determined by the total cost of the clinic minus the revenue generated over all hours of service provided. Thus, the higher cost of the County-operated programs is directly tied to the number of hours of service provided by each clinic.

BHSD’s executives and managers have implemented numerous strategies to improve the productivity and financial sustainability of County-operated clinics since the CalAIM transition to fee-for-service in FY 2024. This includes implementing standard scheduling practices for doctors and many other provider types to maximize client service and associated cost recovery, ensuring appropriate use of administrative staff, training staff in improved Medi-Cal billing, and strategies to increase client engagement and reduce no-shows. Beginning in April of 2025, BHSD formed strategy workgroups to design and implement strategies to improve client engagement, billable activity, and overall financial sustainability within the County-operated clinics. Three groups set measurable and attainable goals to achieve within a 6-month period. One group focused on denied claims with a goal to reduce the percentage of claims sent from County clinics that were denied. Another focused on centralized scheduling with a goal to design processes and schedules that could be scaled to all clinics as several clinics had already implemented some form of centralized scheduling. The last group focused on client engagement with a goal to decrease client no-shows across the system.

Beginning in July of 2025, BHSD leadership visited each County clinic to provide data on costs vs. revenue; the number of billable hours of service; the cost per hour of service compared to CCPs; and

the overall financial outlook for BHSD. BHSD leadership set goals for each clinic that were based on generating enough Medi-Cal revenue to make the cost per hour of service at the County comparable to that of the CCPs. BHSD leadership also worked with each clinic to identify tangible changes that staff could make to increase service hours and provided support with these strategies when needed. BHSD supported clinics through training, on-demand guidance, and technical assistance provided by its newly formed Clinical Standards Team—comprised of clinicians with specialized knowledge of Medi-Cal billing codes. BHSD monitored each clinic’s progress toward the billable hour goals and revisited each clinic two more times since to show staff data, hear about the successes and lessons learned from the strategies attempted, and to understand the support needed. These efforts yielded some improvements across the system, with greater increases in billable hours in some clinics more than others.

As a result of this effort, across all clinics, productivity increased by 2.6 percentage points between the third quarter of FY 2024-2025 and the third quarter of FY 2025-2026. Many staff and clinic managers diligently focused on the sustainability goals and continue to do so. The clinics proposed for consolidation all made efforts to improve but encountered various challenges with meeting the goals. As outlined above, productivity of a given clinic was only one factor in the decision-making process around which clinics to consolidate.

The single most important consideration was and remains access for clients. Thus, even though Narvaez made more progress than Downtown in increasing the number of billable hours of service provided, Downtown is recommended to remain open and receive additional staff instead of Narvaez due to the larger number of clients served at the Downtown Clinic and the analysis that those clients could not be fully absorbed by other nearby clinics. These sustainability improvement efforts will continue on an ongoing basis throughout BHSD’s clinics after the conclusion of the budget process and any associated clinic transitions.

### ***Resulting Recommendations***

Based on the combined analysis of network adequacy, performance, cost, and equity considerations, BHSD recommended the closure of CWBC, Narvaez, Alexian Health Clinic (Adult SUTS), Alexian CFCS (Youth SUTS), and Central Treatment & Recovery. These clinics were selected because their clients can be absorbed by nearby clinics, their performance metrics are lower relative to peer clinics, operating costs are high, and consolidation strengthens the remaining clinics’ clinical and administrative capacity. The closures also align with statewide BHSA guidance, which requires billing Medi-Cal for all claimable activities to the maximum extent possible, and funding restrictions associated with the current financial outlook.

COUNTY OF SANTA CLARA  
**Behavioral Health Services**

Supporting Wellness and Recovery

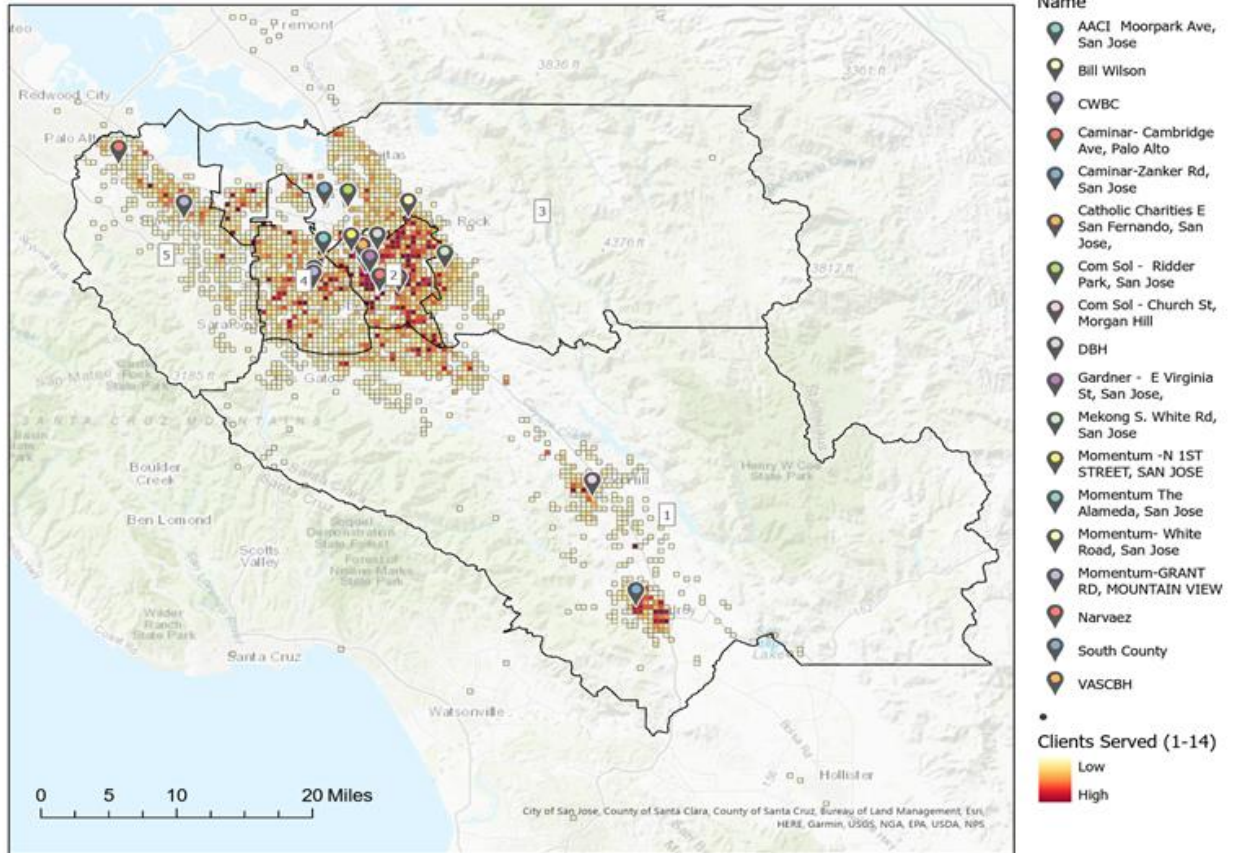

To ensure continuity of care, BHSD will expand staffing at Downtown and Central Valley Clinic, add mobile Narcotic Treatment Program (NTP) services to support geographic coverage, maintain youth SUTS services through CYF clinics and school-based teams, strengthen linkage and navigation functions, implement staged transitions to avoid overwhelming the network, monitor temporary contracted provider closures to new referrals and to adjust capacity as needed.

The clinic consolidation proposals reflect a fiscally disciplined, data-driven process grounded in client service, network adequacy, performance, cost, and equity. These consolidations are necessary to stabilize the system, preserve essential services, and ensure that BHSD can continue meeting its obligations to the community and to the State. Should the proposals be approved, BHSD will continue to update the Board of Supervisors as implementation proceeds and will work closely with staff, providers, and community partners to ensure a smooth transition.
